KEY FACTS

- » High compressive strength
- » Flexible and resistant to cracking
- » Harmless to environment
- » Meet SLW60 loading category (vehicle up to 65 tons gross weight)
- » 1/3 weight of concrete lowers shipping costs

Permeable design

A rigid but open cellular design allows the grids to provide both exceptional support and water management.

Lightweight

Easier to install

Flexible

Polymer construction is semi flexible and resistant to cracking unlike concrete.

High load

Meets high SLW vehicle usage specifications, up to 65 tons- DIN 1072.

Environmentally friendly

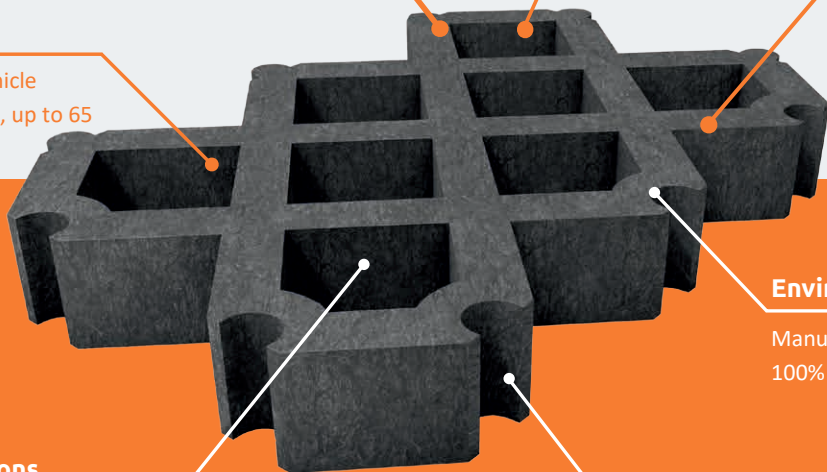

Manufactured from 100% recycled plastic.

Application options

Open cells can be filled with either gravel or soil and seed depending on your application.

Stable

Location fit connection improves stability once units are in position.
